

Dear Sir/Madam,

As a paid member of XM Satellite service I do not believe I should be restricted in what information is available to me. I understand the NAB is pressuring members to take this right away from me. I have the Satellite service because the local broadcasters have both limited service and range. With my Satellite service I am able to have quality reception as I travel accross the country. The ability to recieve traffic and weather information is a safety concern and should not be restricted.

Thank you for your consideration.

Harry Licht
